

# Precautions before PCR test

The test is done with saliva or nasopharyngeal swab

**1. Do not put anything in your mouth 30 minutes before the PCR test for the accurate examination.**

Don't eat and drink

Don't gargle (also mouthwash)

Don't brush teeth

Don't use lip rouge or lip balm

Don't smoke

**2. To prevent infection, you cannot enter the hospital while waiting for or during the test. Please go to the bathroom at home.**

**3. Please be sure to wear a mask.**

**We ask for your cooperation in order to prevent infection and to carry out smooth inspections.**
